

CIRCUITS IDEAS FOR YOUNG CHILDREN

WITH OUR EDUC'GYM WOODEN RANGE

Educ'Gym has designed a specific range of baby gym products, which can be used to create several different circuits for the youngest children.

The bases, ladders, climbing wall and slide in the Educ'Gym wooden range can be assembled to build real circuits promoting psychomotor skills. Children can develop their motor reflexes and abilities. Climbing up, down and over obstacles will sharpen their spatial awareness, improve their agility and build their confidence.

Educ'Gym circuits can be created using the **new connection kit** for linking bases and ladders together.

The circuit possibilities are **endless**. Read through this brochure and discover a number of ready-to-use circuit ideas.

JUNIOR CIRCUIT FOR 3 TO 6 YEAR-OLDS

Check out the different circuit ideas for children from 3 to 6 years old.

Our circuits for young children are created by assembling the different modules in the wooden range together. Children between 3 and 6 years old can challenge each other on fun circuits that are close to the ground, meaning zero anxiety. To make it even easier to create different circuits, a new connector (ref. 0116) is available for quickly assembling and disassembling modules. Children will discover a fun way of improving their spatial awareness, while coaches will benefit from the easy installation with our ready-to-use circuits.

For 3 to 6-year-olds, the height of the circuit must not exceed 1.65 m.

KIDS' CIRCUIT FOR 6 TO 12 YEAR-OLDS

Check out the different circuit ideas for children from 6 to 12 years old.

These ideas feature higher circuits, thereby developing children's muscle strength and agility, while building their self-confidence by improving their sense of balance.

Stack the bases and assemble ladders to gradually increase the difficulty and height, depending on the children's ages and educational needs. This will help children learn by creating a stress-free environment.

THE NEW ESSENTIALS

BASE/LADDER CONNECTION KIT

Ref. 0116

The Base/Ladder connecting kit is the vital accessory for creating a wide variety of learning circuits while linking the range of ladders to the range of bases.

Connect and remove modules over and over again to your heart's content, depending on the children's ages or the required level of difficulty. This kit has been designed for quick and easy use when making changes to circuits.

NEW!

WARNING!

In case of circuits for 3 to 6-year-olds, only the small ladders and the slide can be connected. Bases must not be stacked, and the overall design cannot exceed the height given by the small ladders, i.e. less than 1.65 m.

Check out our full wooden range in the **Educ'Gym** catalogue specifically designed for young children.
