

« ACROFLEX » TRACKS

- ❑ Sprung adjustable elasticity track (only for **Ref. 6260**)
The elasticity can be adjusted quickly and easily on each section which enables rebound to be modulated over the 6 m track length.
- ❑ Stable track thanks to foam cubes and springs.
- ❑ Beautiful finish with covering carpet and side skirts
- ❑ Its design contributes to reduce strain injuries from repeated practice
- ❑ Suits to all gymnasts' builds and all ability levels

*=> The two types of track, adjustable and non-adjustable, may be used in combination
Please ask for details of special junctions between tumbling tracks and pits*
