

TUMBLING TRACK INFLATABLE

* **Rapidity and autonomy:** installed in less than 10 minutes and can be used several days without having to be re-inflated.

* **Adjustable:** the firmness of the track can be adjusted according to the weight of the users and the difficulty of the exercises.

* **Fun and educational:** can be used for practicing and teaching acrobatics, for example, in children's early learning.

* **Safe:** ideal for acrobatics while limiting ankles and wrists' injuries caused by repetitive exercises.

* **Overall size:** easy to transport and store, less than one square meter is necessary. Once folded, the track with its motors can fit in the back of a car.

TECHNICAL FEATURES

- **Dim.** = 1,500 x 210 x 20 cm (Lxwxh)
- **Weight** = 107 Kg
- **Inflation time** = 1 minute 30 seconds
- **Colors** = grey with border and 2 red strips lengthwise
- **Floor space** = 90 x 75 x 50 cm
- **Optional** = Trolley - **Ref. 6293B**

Composition:

- * 3D PVC fabric to ensure that the track is perfectly flat
- * No excessive thickness thanks to glued PVC joints
- * Hook and loop connections on the 2 widths
- * 3 inflation/deflation/pressure valves
- * 8 carrying handles

Accessories:

- * 2 inflators
- * A repair kit
- * A pressure gauge
- * A protective cover

2 reversible motors to inflate/deflate

A repair kit consisting of:
PVC offcut + glue + instructions

3 valves for better flow during inflation and deflation

“Safety” valves with adapter:
Makes deflation easy

VARIOUS STEPS FROM RECEIVING THE TRACK TO ITS USE

1. Receive the track

2. Unpack and check the packages

3. Unfold the track

Track should be unfolded and folded back again flat for an optimal use

4. Inflate the track

2 motors for a quick inflation/deflation

5. Use the track

Hook and loop on both widths to add landing mats
