

INVERTED FRAME

- Ideal for learning gymnastics elements with rings
- Its fastenings allow gymnasts to have a strong support and a total security during their movements
- Adjustable in height (**Ref. 3768**), this frame absorbs shocks reducing micro-injuries
- Ideal for trainings, this frame allows to save place compared to a competition ring frame

Ref. 3768

TECHNICAL FEATURES

- Fixed to the ceiling or to a framework, its fixing required a detailed sketch of the framework (consult us).
- Fixing realize thanks to chemical bedding anchors
- These frames require a environment free from any constraints
